

April 2, 2012

I just want to be known how I have looked and searched for a good doctor in Albuquerque. I had a doctor in Las Lunas for many years and when I moved here I needed a new primary. I was told about Dr. Goodluck and found out for myself what a truly wonderful doctor he is!

Recently, I was really sick and came to see Dr. Goodluck. He came out to the waiting room because he could see I was feeling so bad. I never had a doctor give me attention so quickly. He directed me to the hospital after he checked me out. He could see I was really sick and needed more attention. He did not make me wait and this meant a lot to me.

Dr. Goodluck really listens and is truly concerned about how you feel. He treats me like a person and not just a number. I am a person to Dr. Goodluck and this is important. I had a doctor before that gave me five minutes of his time and kept the stethoscope on his neck and never listened to my heart and that the god, honest truth!

I tell my family and friends to see Dr. Goodluck, as he is a wonderful doctor who really cares!

Sincerely,

Mona M. Chavez
