Dear Dr. Goodluck,

Thank you for taking such good care of my husband, Tony Boder. As he is in the health care industry and is surrounded by Nurses and Medical Directors, he is really good at self-diagnosing. It takes a push, shove and a bulldozer for me to get him in to see a physician.

He came home last night stating that he was so impressed how thorough you were and was excited to implement the ideas you recommended. He felt quite comfortable with you and I think I won't need to rent the bulldozer next time.

I also sent my neighbor your way with her ailing father that just moved here from Texas. I had mentioned your name to her and your office was able to get her father in right away. She again was impressed with your level of care. After the visit the father relayed to my friend that he had never had a doctor who listened and had so much compassion for the state he currently is in.

I know starting out on your own practice can be very time consuming, but I am so pleased you and Laurie followed your instincts. Your practice is just going to soar.

Thank you for all you do!

Regards,

Kitty Szarkowski
